RUSH Sequence Search for 09834291

Subject: Importance: High

Hi Chris-

Could you please approve the following search for an after final amended case.

Please search for the following in the commercial, interference and issued patent databases:

A nucleic acid sequence comprising SEQ ID NO: 1, 2, 3, 4, 6, 15 or 24;

A nucleic acid sequence consisting of SEQ ID NO: 10, 12 or 14

Thank you.

on Aug 31, 2001 this sequence version replaced gi:14161146.
On Aug 31, 2001 this sequence version replaced gi:n4161146.
On Aug 31, 2001 this sequence assembly data is compared from overlapping clones.

Note that the where differences are found these are annotated as variations
together with a note of the overlapping clone name. Note that the
variation annotation may not be found in the sequence submission
together with a note of the overlapping clone, as we submit sequences with
corresponding to the overlapping clone, as we submit sequences with
only a small overlap as described above.

This sequence was finished as follows unless otherwise noted: all
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Bukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           /clone_lib="TyVEG118 Tachyzoite cDNA Library"
/note="TyVEG118 Tachyzoite cDNA Library"
: This library was constructed by Keliang Tang, Robert
cole, and L. David Sibley at Washington University. cDNAs
size-selected and directionally cloned into the Uni-ZAP XR
lambda vector (Stratagene). The primary library was mass
excised as phagemids and rescued in SOLR cells. The
plasmid library was recovered from the SOLR cells and
inc. Jeor sequencing. WARNING: This library may contain
a small percentage contaminants from human fibroblast
secols."

// Site_2: Not!; The poly (A) + RNA was dephosphorylated with sacterial alkaline phosphatase (BAP) and then decapped for the stand constant of the first intact mRNA was ligated with DNA.RNA linker including priming with dT-tailed vector. The dT-tailed vector was circularized with E. coli DNA ligase and the first adjusted to have about 60mt. The cDNA vector was converted to a DNA strand by Okayama-Berg method. The cDNA transformation of obtained cDNA vectors were used for transformation of full-length enriched cDNA library, by electroporation method. The cDNA this method are library, the abundant cDNAs were selected and are library, the abundant cDNAs were selected and mpthere constructed by this method are products were used as template for primer including Tromotor as 5, primer and N(dT)14 as 3, primer. The pCR reaction. The synthesized RNA by in vitzo transcription liberary and incubated with avoidin-gel. After removing DNA-RNA hybrids by centrifuge, the subtracted cDNA incompetent form original libraries were constructed by the subtracted cDNA incompetent constructed by the subtracted cDNA promotor as 5 primer and N(dT)14 as 3, primer. The PCR reaction. The synthesized RNA probes were hybridized with libraries were constructed by transformation of incompetent cells E. coli ToplOF, with
